

INTEC Engineering GmbH

POINT (8.5641327 49.1197402)

INTEC Engineering GmbH - is specialized in state of the art solutions for process heating in many different industrial branches.

The product range comprises:

- Thermal oil heaters, steam and hot water boilers
- Solid fuel and biomass firing systems
- Waste heat boilers
- Electrical Power Generation as complete plant or with individual modules
- Fired heaters for Oil & Gas industry.

Further to this INTEC offers solutions for modern environmental applications, such as

- combustion of biogas with connected power generation
- ORC power plants
- industrial and municipal sewage sludge drying and incineration systems
- power generation by solar Thermal (CSP) and photovoltaic (PV) application
- municipal waste fired cogeneration plants.
