

NIVUS GmbH

POINT (8.89416 49.1044887)

We are developer, manufacturer and supplier of instrumentation for the water industry. After more than 45 years of activities in the flow and level measurement sector, NIVUS are one of the worldwide leading companies in this area. The product portfolio among other products comprises instruments for flow measurement, flow velocity detection, level measurement and water quality measurement. Moreover, we provide according software systems for acquisition, recording and processing of data. A comprehensive process conducting system completes the product range. Flow measurements and hence the various types of flow meters is the main field of activity at NIVUS GmbH. We provide flow meters for portable and non-portable use. Not only the development and the manufacturing of products benefit from company know-how and experience, but also services such as the implementation of complete measurement campaigns. Installation and commissioning of NIVUS flow meters and flow measurement and instrumentation as well as competent support regarding operation of analysis, level and flow meters are provided too.
