STORAGE SYSTEMS RETHOUGHT

Storage systems designed by RCT Power make intelligent use of solar energy and enable home owners to become independent from power suppliers. RCT Power is one of the few companies that develops inverters and battery storage systems in house. Our systems are fine tuned for optimal performance. We provide a one-stop system solution for our customers including optimised servicing of all system components.

RCT Power is committed to challenge existing technology standards and continuously improve our product range. The dedicated team of engineers at the RCT Power Inverter Research Department has investigated limitations and bottlenecks in commonly used battery based storage systems. We have implemented the findings of this study in our new solution for storage systems. The results are impressive. We have created a flexible and reliable storage system of the highest quality. It is also very easy to install and operate.

RCT Power GmbH is a manufacturer of inverters and stationary storage solutions for domestic use. The registered business address is in Konstanz (Lake Constance). At RCT Power GmbH we have assembled an experienced team of experts in the field of power electronics. Together we work on innovative solutions enabling a better and sustainable usage of solar power. Many of our members of staff have previously worked for the R&D department of Sunways AG.

RCT Power Battery

The high voltage battery from RCT Power guarantees highest efficiency and autonomy. The modular system can be upgraded and adapted to fit user requirements. Your system grows to accommodate new energy consuming appliances, e.g. an electric car. All our batteries are delivered in the elegant design that is typical for RCT Power.

The RCT Power Battery excels at safety and in battery lifetime. The energy storage for solar electricity uses lithium iron phosphate battery cells that are considered to be among the safest lithium ion batteries. Add the wiring technology and a very high value battery management system – all Made in Germany – and RCT Power battery will be the ideal solution for your storage requirements.

RCT Power Storage

The RCT Power Storage DC and AC are clever inverter with battery connection to enable private consumption of the solar energy you have generated with your photovoltaic installation. They distribute solar power intelligently, optimise yield and utilise the battery responsibly.
